

8180P01

TX-I/O™

P-bus interface module TXB1.PBUS

- Interface between the automation station and the bus of the TX-I/O modules
- Integrated DC 24 V, 1.2 A to supply power to TX-I/O modules and field devices
- USB port for tool connection
- Compact format (to DIN43 880), small footprint
- Simple installation and easy access
 - Self-establishing bus connection for maximum ease of installation
 - Plug-in screw terminals
 - Fuse is accessible with device installed
- Easy, fast diagnostics

Overview

Key

- A Plug-in screw terminal ("1" on housing)
 - 1 PC P-bus clock
 - 2 PU Reference voltage
 - 3 PD P-bus data
- B Plug-in screw terminal ("4" on housing)
 - 4 CS DC 24 V supply for modules and field devices
 - 5 CD Island bus signal
- C Plug-in screw terminal ("6" on housing)
 - 6 24V~ Supply for bus interface module and Field devices
 - 7 ⊥ System ground
- D Fuse, T 10A, for AC 24 V field supply
- E LED: "AC 24 V field supply OK"
- F LED "DC 24 V module supply OK"
- G Status LEDs
- H USB port for TX-I/O tool
- I Bus connector
- K Bus cover (for right end of an I/O bar)
- R Slide fitting for standard mounting rail

Mechanical characteristics

Housing

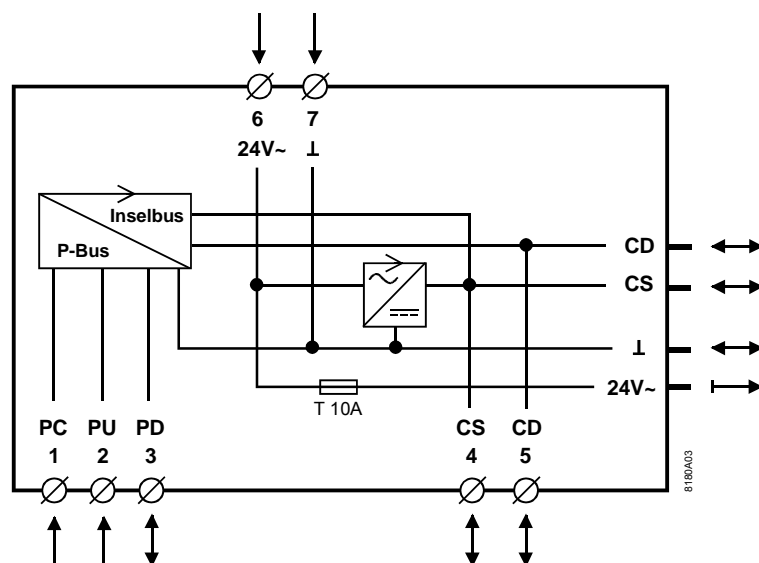

- The housing complies with DIN 43880 and is 90mm wide.
- The plastic housing is provided with a large number of vents for cooling
- When mounting, allow for sufficient heat dissipation by convection (max. ambient temperature 50°C)

Electrical characteristics

- | | |
|-------------------------------------|---|
| Power supply module | <ul style="list-style-type: none"> • The bus interface module is supplied with AC 24 V. The tolerance range is $-10 \dots +20\%$. • The device generates a supply voltage of DC 24 V ("Module supply 24V=") for the modules and field devices, designed for a current rating of 1.2 A. • The power supply module is short-circuit proof. • Parallel operation is permissible as follows: <ul style="list-style-type: none"> – A maximum of 3 power supply modules can be operated in parallel with one bus interface module – However, each I/O bar can accommodate a maximum of 1 additional power supply module (see [3]) • To supply the field devices, the AC 24 V supply voltage is connected via a T 10A fuse to the island bus ("Field supply 24V~", maximum admissible current 6 A). |
| Interfaces | <ul style="list-style-type: none"> • Plug-in screw terminals for supply voltage (24V~, \perp), island bus (CS, CD) and P-bus connection (PC, PU, PD) • USB port type B for connection of the TX-I/O tool. |
| Island bus | <ul style="list-style-type: none"> • The I/O modules are mounted to the right of the bus interface module on the standard mounting rail. The electrical connection is established via the four island-bus contacts on the side of the modules. The bus is created automatically when the TX-I/O™ devices are connected one next to the other on the rail. • There is no bus connector on the left side of the device • For expansion purposes, the CS and CD signals of the island bus are also routed via terminals. |
| System ground | <ul style="list-style-type: none"> • The I/O modules and all connected field devices are connected to the same system ground (\perp). • The system ground of the I/O island (\perp) and of the automation station (G0) are electrically connected (in the P-Bus interface module) |
| Fuse | <ul style="list-style-type: none"> • In the event of overload or short circuit, the fuse (T 10A) cuts off the AC 24 V field supply voltage (but not the bus interface module's supply voltage) • The fuse can be replaced without removing the bus interface module. |
| Protection against incorrect wiring | <ul style="list-style-type: none"> • All terminals are protected against shortcut and incorrect wiring with AC/DC 24 V • This is the case even for incorrect AC phase sequence • Bus connector on side: no protection • Voltage > AC/DC 24 V: no protection |

Circuit principles

LED indication

When the bus interface module is switched on, all LEDs light up for approx. 2 seconds (LED test)

RUN (Green)

The LED lights up when the device CPU is in operation

FLT (Red)

- The LED lights up in the event of a fault (see below)
 - It flashes slowly if there is no configuration
- It flashes quickly while configuring the modules and while the TX-I/O Tool creates an Island bus report
- For detailed information on diagnostics, see [3].

COM (yellow)

The LED lights up to indicate communication on the P-bus

Fuse LED
for field supply

Indicates AC 24 V supply to bus interface module and field supply:

- ON AC 24 V (supply voltage) input present, and Fuse OK
- OFF No AC 24 V (supply voltage) input, or Fuse blown

Module supply LED

(CS conductor)

Indicates DC 24 V module supply / field supply:

- ON Module supply OK. *When other supplies are in the I/O island (CS >21.5 V) and AC 24 V is OK, the LED is also ON.*
- OFF Module supply not OK
Reason: no AC 24 V (supply voltage) input, or AC/DC converter faulty.

Disposal

The device includes electrical and electronic components and must not be disposed of as domestic waste.

Current local legislation must be observed.

Engineering, mounting, installation and commissioning

Please refer to the following documents

Document	Number
[1] TX-I/O™ module data sheets	CM1N817...
[2] TX-I/O™ functions and operation	CM110561
[3] TX-I/O™ Design and installation manual	CM110562
[4] TX-I/O™ Engineering documentation	CM110641 ff
[5] Replacement of legacy signal types	CM110563

Engineering

The following information is required when sizing the power supply for an I/O island (see [3]):

- Number and type of modules to be supplied (basic consumption of module electronics)
- Type and number of data points (Consumption per configured data point)
- Type and number of field devices to be supplied via the field power supply

Mounting

Mounting	The module is mounted on a standard 35 x 7.5 mm mounting rail (top-hat rail type TH35-7.5 to EN60715)
Sequence	The first item on an I/O bar is always the power supply device (bus interface module, power supply module or bus connection module, see [3]).
Replacement	A bus interface module can be removed from the row of modules but to do this, it is essential to remove the plug-in I/O unit from the adjacent module to the right . There is no need to remove the terminal base of this module.
Permitted orientation	The TX-IO™ devices can be mounted in any orientation: It is important to provide adequate ventilation so that the admissible ambient temperature (max. 50°C) is not exceeded.

Technical data

Operating voltage (24V~, ⊥)	Extra low voltage SELV or PELV in accordance with HD348	AC 24 V, -10 ... +20%
	Half-wave load	50 ... 60 Hz Symmetrical
Power consumption	Without module and field device load	7.5 VA / 0.31 A
	With maximum admissible load DC 24 V / 1.2 A	55 VA / 2.3 A
	With maximum admissible load DC 24 V / 1.2 A + AC 24 V / 6 A	200 VA / 8.3 A
Protection against shortcircuit and incorrect wiring	Bus connector on side	No protection!
	Terminals	See below
DC output (CS, ⊥)	Nominal voltage	DC 24V
	Max. current	1.2 A
	Can be connected in parallel (regulated output voltage)	For details refer to [3]
	Short-circuit-proof, overload protected	
	Excess temperature cutout Indication	Self-resetting LED "24V="
AC output (24V~, ⊥)	Nominal voltage	AC 24 V
	Max. current	6.0 A
	Fuse	T 10A (replaceable)
	Indication	LED "24V~"
Island bus communication PBUS communication	(CD, CS)	Short-circuit proof
	(PC, PD,PU)	Short-circuit proof
USB port	Socket	Type B (USB device)
	Data speed (USB 1.0 Full Speed)	12 Mbits/s
	Electrically isolated from ⊥	No
	Protective circuit for protection from overvoltage and overcurrent	Yes

Plug-in connection terminals	Mechanical design	Plug-in screw terminal
	Solid or stranded copper conductors with connector sleeves	1 x 0,6 mm \varnothing to 2.5 mm ²
	Stranded copper conductors without connector sleeves	or 2 x 0,6 mm \varnothing to 1.5 mm ²
	Screwdriver	1 x 0,6 mm \varnothing to 2.5 mm ²
		or 2 x 0,6 mm \varnothing to 1.5 mm ²
		Slot-headed screws
		Screwdriver No. 1
		with shaft diameter \leq 4.5 mm
	Max. tightening torque	0.6 Nm
Classification to EN 60730	Mode of operation of automatic electrical controls	Type 1
	Contamination level	2
	Mechanical design	Protection class III
Housing protection	Protection standard to EN 65029	
	Front-plate components in DIN cut-out	IP30
	Terminal section	IP20
Ambient conditions	Operation	To IEC 60721-3-3
	Climatic conditions	Class 3K5
	Temperature	-5 ... 50 °C
	Humidity	5 ... 95 % rh
	Mechanical conditions	Class 3M2
	Transport	To IEC 60721-3-2
	Climatic conditions	Class 2K3
	Temperature	-25...70 °C
	Humidity	5 ... 95 % rh
	Mechanical conditions	Class 2M2
Standards, directives and approbations	Product safety	
	Automatic electronic controls for household and similar use	EN 60730-1
	Electromagnetic compatibility	
	Interference immunity	Industria environments
		EN 61000-6-2
	Emitted interference	Residential, light industrial
		EN 61000-6-3
	Meets the requirements for CE marking in	
	EMC Directive	89/336/EEC
	Low Voltage Directive	2006/95/EEC
C-tick conformity		
in accordance with Australian EMC framework	Radio Communication Act 1992	
Radio Emission Standard	AS/NZS 3548	
UL approval (UL 916)	75M5	
Color	Housing	RAL 7035 (light gray)
	Housing to DIN 43 880, see "Dimensions"
